

Publish now with *Clinical Neurophysiology Practice*

Official Organ of the International Federation of Clinical Neurophysiology.

Clinical Neurophysiology Practice (CNP), a new Open Access journal, focuses on clinical practice issues in clinical neurophysiology including relevant new research, case reports or clinical series, normal values and didactic reviews. It is an official journal of the **International Federation of Clinical Neurophysiology** and complements Clinical Neurophysiology.

CNP supports established clinical practice, and the educational role for trainees, technicians and practitioners. It provides a vehicle for extended case reports and a forum for discussion of clinical practice. This is in addition to providing an opportunity for good papers that do not fall within the research priorities of Clinical Neurophysiology (e.g., normative studies; good studies that are largely confirmatory; technical and methodological studies).
